

BALANCING EXPECTATIONS WITH THE TEACHER

- Which topics will be covered in the student-teacher sessions? (Semester plan and progression).
- Which materials will the student teacher use in the teaching, and where can he/she find them?
- What should the students learn in the student-teacher sessions?
- What are the roles of the student teacher and teacher respectively?
- Who should the students contact with questions regarding the lectures and the student-teacher sessions?
- To what extent should the student-teacher sessions prepare students for the exam?
- Should the student teachers attend the teacher's lectures?
- Will there be meetings between the student teacher and the teacher during the semester? (Make clear agreements for when and how often)
- How can the student teacher contact the teacher?
- If the teacher has made a plan for the student-teacher sessions, how much freedom is the student teacher allowed in terms of changing and adding to this plan?
