## My concrete objectives regarding the internship

**Formulate four to six concrete objectives that you have set for yourself at this moment concerning your encounter with the company.**

- You may start by writing: *"I would like to get experience in..."*, *"I would like to become better at..."*, *"I would like to become particularly good at..."* etc.
- Relate your selected learning objectives to some of your targets.
- Save the objectives so that during your internship you can consider if you are working towards the objectives you have set up.
