

## Project placement

### Inspiration sheet for supervision during the internship

Using the inspiration sheet for questions the teacher may ask the student in their capacity of supervisor:

- The inspiration sheet is intended to encourage the student to consider the reflection questions below, which the supervisor presents and discusses with the student.
- The reflection sheet is the second of three handouts – one to be used before the internship begins, one during the internship and one after/towards the end of the internship.

## 2. Reflection questions **during** the internship:

- How do you experience that you are using your academic competences in your internship?
- Mention a brief episode when you experienced that you were bringing your academic competences into play. (What did you do? What did you learn?)
- What roles do you assume in your internship?
- Is there anything in your role and function relating to your academic competences that you wish to change in future? If yes, how?
- Find a relevant academic objective from a previous course and formulate some concrete examples from your internship where you are using your acquired study-related skills and knowledge. As regards the internship examples: Which competences did you use?
