

LOGBOOK FOR YOUR PROJECT PLACEMENT

Below you will find a number of possible questions that may be helpful when you write down and register work tasks (learning activities) and reflect on these in your logbook. Remember that the logbook is a personal (and live) learning tool intended to add meaning for you when using it – so find the form that suits you best.

- What was the situation?
- What did I do? (Possibly also: What were my thoughts at the time? What did I feel? Etc.)
- What did I learn? What did I take away from this?
- Which skills and competences was I using? Which study-related skills and competences did I use in practice in the situation?
